On your path...

🌲 Treves (A)

In Antiquity, the village square was a cemetery. The name Trèves is believed to derive from the Gaulish trebo - meaning 'village' according to some sources or the Celtic water goddess according to others - or perhaps from trivium, crossroads... The track going over the Roman bridge at Le Trévezel, restored in the 18th century, was in fact an important road in Antiquity. There is another hypothesis if you consult Boissier de Sauvages' 1820 dictionary, in whose opinion Treva or Trebo are Occitan words referring to phantoms or spirits. You might well be tempted by this version once you know the history of the Pas de Joulié cave described below! (B. Mathieu)

🌿 Box (Buxus) (B)

Boxwood and humans: a long relationship! When livestock farming increased, the primeval oak forest opened up and box – which is too hard for sheep's teeth – took hold everywhere. Humans discovered one of its major qualities: broken up and scattered over the ground as a litter, it protects vegetable seedlings from drought and frost. Its leaves can make up for a lack of straw for fertilising arable land. In 1818, a decree issued by the prefect of the Gard department worried about the excessive clearing of box groves and the messy manner in which they were being uprooted, without adequate tools. Until about 1910, you might see mules laden with enormous bundles of box; then chemistry took over. (B. Mathieu)

🏠 Joulé cave (C)

In March 1952, Jolly, a forestry official, showed his friend Frayssignes this cave. Deposited in it they discovered the remains of 300 humans from the Neolithic, who had been carefully laid out side by side. The cave was rapidly declared a historical monument. In the depths of the cave, a great number of bear bones was also found. This cave bear, the ancestor of our brown bear (*Ursus spelaeus*), had a skull 50 cm long! In the winter, groups of these bears would have huddled together in clay wallows at the rear of the caves. *Ursus arctos* succeeded the cave bear and was succeeded in turn by the brown bear, which was hunted to extinction in the 15th century.
