

# The cliffs of the Causse Méjean

Causse Gorges - Le Rozier

Les gorges de la Jonte et les vautours (nathalie.thomas)

*A walk between the Jonte and Tarn gorges, with panoramic landscapes and, in the skies above, the four European vulture species that live on the Grands Causses plateaux.*

## Useful information

Practice : Hiking on foot

Duration : 4 h 30

Length : 11.3 km

Trek ascent : 930 m

Difficulty : Medium

Type : Loop

Themes : Agriculture and livestock farming, Fauna and flora, History and culture, Transports en commun

# Trek

**Departure** : Le Rozier

**Arrival** : Le Rozier

**Markings** :  Yellow waymarks

**Cities** : 1. Le Rozier

2. Saint-Pierre-des-Tripiers

## Altimetric profile

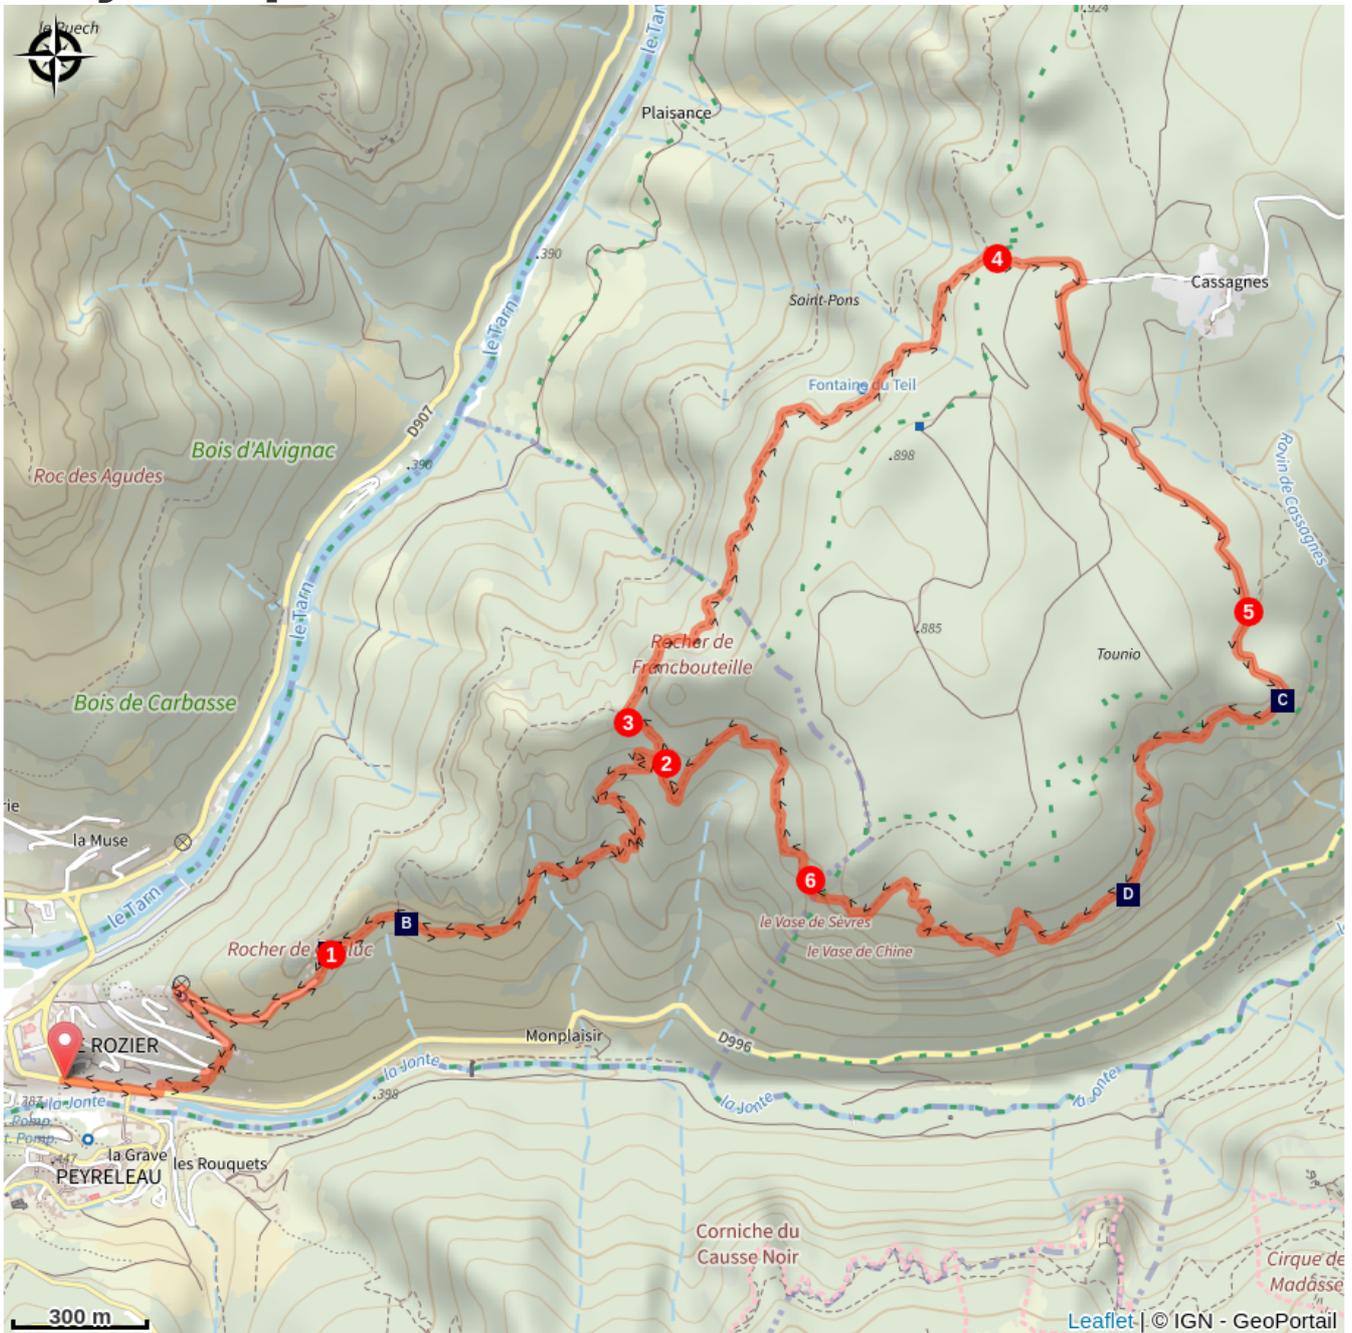

Min elevation 403 m Max elevation 866 m

From the Place de la Mairie (town hall square) in Le Rozier, turn right then left in the village, and take the staircase between the houses on the left. Keep going uphill to the hamlet of Capluc.

- 1) At Capluc, you can choose to climb Capluc Rock (there and back, 30 min). If you do not, go past the bread oven and stay on the path that goes upstream in the Jonte gorge and continue to climb the hairpin bends of Echo Ravine. Ignore the path that goes downhill on the right.
- 2) At the crossroads, turn left and go uphill to the Col de Francbouteille pass.
- 3) At the pass, you go over into the Tarn valley. Turn right and take the path which more or less follows the contour line.
- 4) Turn right towards the Col de Cassagnes. At the first crossroads, go straight ahead, at the second turn right towards the Corniches de la Jonte.
- 5) Here, the track becomes a path. This runs along the cliff edge, passing Balcon du Vertige, Pas du Loup, Vase de Chine and Vase de Sèvres.
- 6) At the crossroads, turn left to go down to Capluc, from where you return on the same path.

# All useful information

## Is in the midst of the park

The national park is an unrestricted natural area but subjected to regulations which must be known by all visitors.

## Advices

This walk is not recommended for those suffering from vertigo (sections at cliff's edge). Make sure your equipment is appropriate for the day's weather conditions. Remember that the weather changes quickly in the mountains. Take enough water, wear sturdy shoes and put on a hat. Please close all gates and barriers behind you.

## How to come ?

### Transports

**Bus stop:** Monument aux morts

- Bus line 258 "Florac - Sainte-Enimie - Le Rozier", every day in July and August.
- Bus line 215 « Millau - Peyreleau - Meyrueis »

<https://lio.laregion.fr/>

### Access

From Meyrueis, drive down the Jonte gorge on the D 996 to Le Rozier.

### Advised parking

Car park in the village

## Information desks

### Tourism'house and national Parc at Florac

Place de l'ancienne gare, N106, 48400 Florac-trois-rivières

# On your path...

---

## 🏰 Capluc (A)

Capluc was once a defensive and surveillance site, with a castle that (like many of the village's houses) no longer exists. Some of the houses were renovated once a track suitable for motor vehicles was opened to the hamlet. The name Capluc is believed to come from cap and luz, meaning head and light, thus symbolising the place illuminated by the first rays of the rising sun.

---

## Capluc and its terraces (B)

As you leave Capluc, you become aware of how the site, which at first sight seems barren, has in fact been shaped by humans. All of this south-facing slope, which is protected by the tall dolomite cliffs, was farmed using terraces (grains, fruit trees, grapevines). Temperatures are so favourable that the most southern Mediterranean vegetation of the region grows here (narrow-leaved ash, jasmine, Montpellier maple, holm oak, etc.).

---

## 🦅 Vultures (C)

You are close to the historic site where the griffon vulture was reintroduced from 1982 onwards. Since then, the cinereous vulture (1992) and the bearded vulture (2012) have also been reintroduced. The Egyptian vulture returned of its own accord in 1986. It nested locally in 1997, but it remains rare and very localised in this region. In the Mediterranean basin, the presence of vultures is associated with sheep farming and herd mortality.

## ⚠ Balcon du vertige (vertigo balcony) (D)

This site, almost 400m above the bed of the Jonte, deserves its name. It is the only spot on the walk from which you have such breathtaking views over the gorge. Opposite you is the Causse Noir, with a heavily fissured rock in the foreground, the Ranc del Pater, on which remain some wall sections of Saint Michael's hermitage (former château of Montorsier). The tall rectangular cliff on its right is known as Roc Fabié. If you lean forwards, you can see, from upstream to downstream, La Caze and Le Truel hamlets, and below you the Maison des Vautours (vulture belvedere), which was opened in 1998 and traces the local history of vultures.
