

From Meyrueis to the summit of Mont Aigoual (Day 1)

Causse Gorges - Meyrueis

La descente du plo du Four (Nathalie Thomas)

A day for hiking to the top of Mont Aigoual via Cabrillac, through forests of crooked beeches and the Aigoual grasslands with their many colours in spring.

From Puech Pouchut along the ridges of Peyremoula, you have handsome vistas onto the Causse Méjean plateau and the Brèze valley. There is a steep hike through the forest after the hamlet of Cabrillac before the grasslands of the summit of Mont Aigoual come into view!

Useful information

Practice : Hiking on foot

Duration : 6 h

Length : 19.5 km

Trek ascent : 1051 m

Difficulty : Medium

Type : Roaming

Themes : Agriculture and livestock farming, Architecture and village, Causse and Cévennes / UNESCO, Fauna and flora, Forest, History and culture, Water and geology

Trek

Departure : Meyrueis

Arrival : Mont Aigoual

Markings :  GR (long-distance hiking path)

Cities : 1. Meyrueis

2. Gatuzières

3. Rousses

4. Bassurels

5. Val-d'Aigoual

Altimetric profile

Min elevation 717 m Max elevation 1559 m

From Place Sully walk towards Les Ayres on the RD 57.

1 - Pass the Le Jardin des Cévennes campsite on the right and go uphill towards the Village de Vacances (holiday village). After the reservoir, you enter the woods (waymarked GR®66).

2 - The track goes steadily uphill to the Col del Bès pass (GR®66).

3 - The path descends into the Jonte valley and crosses a bridge before reaching the hamlet of Cabrillac (GR®66).

4 - In Cabrillac you leave the GR®66 long-distance hiking path for the GR®60, heading for the top of Mont Aigoual. Steep climb for 2 km, to Serre Ploumat. The path overlooks the RD 18 road. When you reach the RD 118 take it to the summit of Mont Aigoual.

On your path...

📍 Cabrillac (A)

📍 Summit of Mont Aigoual (C)

🛣️ The Aubrac drivers' road (B)

📍 The meteorological observatory (D)

All useful information

Is in the midst of the park

The national park is an unrestricted natural area but subjected to regulations which must be known by all visitors.

Advices

Make sure your equipment is appropriate for the day's weather conditions. Remember that the weather changes quickly in the mountains. Take enough water, wear sturdy shoes and put on a hat. Please close all gates and barriers behind you.

On your path...

🏠 Cabrillac (A)

Cabrillac was located at the crossroads of the grande draille d'Aubrac (Aubrac drovers' road) and the road from Meyrueis to Florac and St Jean du Gard. The village had about a hundred inhabitants in the 20th century and was an important and inevitable place of transit. Two fairs were held every year: one during the migration to the summer pastures in May; the other in September, during the return. For some shepherds, this was the occasion to sell the lambs that had spent the summer on the Aubrac plateau.

The Aubrac drovers' road (B)

From Cabrillac, we follow the Aubrac drovers' road, which started near Ganges (Hérault) to lead flocks onto the Aubrac pastures, a distance of 110 km. If you climb to the top of Mont Aigoual (2 hrs), you can visit the meteorological observatory and meet transhumant flocks. Be careful of the patous (livestock guardians).

🌄 Summit of Mont Aigoual (C)

At an altitude of 1,565 m, the climate is harsh: weather conditions are the same as they would be at 2,000 m elsewhere, with only four "frost-free" months a year. Winds of above 60 kph blow on 265 days a year, and the average annual temperature is 4.8°C. Trees do not have enough time to complete their life cycle. Local plant formations are those of the montane zone: subalpine short-grass prairies.

🌲 The meteorological observatory (D)

Inaugurated in 1824, the meteorological observatory was built on the initiative of Georges Fabre, one of the pioneers of the reforestation of Mont Aigoual. His work with the botanist Charles Flahault enabled the creation of the arboretum of L'Hort de Dieu. The first meteorological data were gathered by agents from the French National Water and Forestry Commission. Since 1943, the observatory has been managed by the National Meteorological Office. It is France's last mountain weather station that is inhabited year-round.
