## Domaine des Boissets (A)

The stone framework of several windows suggests that the first buildings were built as early as the 15th. The farm was operational until 1960. The hamlet consists of six buildings, houses, outbuildings and sheepfolds, in the typical Causse style. The internal courtyard was closed off by walls that were much higher than they are today. A bread oven, cisterns and threshing floor complete the complex, showing that the inhabitants lived in autarky.

## The terraces (B)

Locals have transformed the rocky slopes into hanging gardens by making use of the smallest of flat spaces. They carried the soil up in baskets or sacks on their backs. This is where they would have planted their vegetables and fruit trees (peach, walnut, almond). Until the early 20th century, almond trees were the “great resource” that made good use of soils too poor for other crops.

Until 1851, there were 54 hectares of grapevines for 850 inhabitants. The vineyards clung to 45-degree slopes, which made work difficult. The low yield, disease and mechanisation were all factors in the abandonment of this crop. The municipality of Ispagnac reintroduced vines in 2003 when a winemaker settled there; a second settled in Blajoux in 2006.
